LivEco was established to deliver homes which exceed customer expectations as well as government targets. We have been leading exponents of ecological and low energy house building, refurbishments and retro fits for many years and have a portfolio of high quality homes and satisfied customers. Our developments are designed to be future proof and provide tomorrow’s standards today.

We are especially proud that our work at Great House Farm has been recognised by the Welsh Government with two Housing Ministers opening previous phases here.

Great House Farm

One garden and one community
Growing together into a kingdom
With sun and rain, turns into a circle
Ready for fellowship

Poem written by Mari George
Commissioned as part of the National Eisteddfod of Wales 2015

LivEco was established to deliver homes which exceed customer expectations as well as government targets. We have been leading exponents of ecological and low energy house building, refurbishments and retro fits for many years and have a portfolio of high quality homes and satisfied customers. Our developments are designed to be future proof and provide tomorrow’s standards today.

We are especially proud that our work at Great House Farm has been recognised by the Welsh Government with two Housing Ministers opening previous phases here.
A new Award winning Eco Village on the edge of Cardiff

This is the third and final phase of this award winning residential scheme in St Fagans. A rural peaceful setting that is only a short journey to a bustling, internationally recognised Capital City with its huge range of amenities, services, excellent road links and international airport. From world class sport, theatre, culture and restaurants to amazing shopping – Cardiff has it all.

Storage Batteries
Each home has a stationary storage battery to store the excess energy generated from your roof, use this free energy when you want it.

Bespoke Kitchens
High quality contemporary designed kitchens by Sigma 3, Cardiff

PV Panels
Generate energy from the daylight on your roof with these slender black PV panels, transferring free energy into your home.

Mechanical Ventilation with Heat Recovery
An air filtration system expels stale air but retains the heat which is then added to fresh incoming air, to give your home a constant supply of fresh air at the correct temperature for you.

High Specification
These homes are all fitted with high quality appliances and a beautiful, luxurious finish as standard.

Wildlife on your doorstep
The neighbours are friendly too, there’s an abundance of wildlife on this edge of city location.

Heat Pump
No fossil fuels needed, heat your home and generate hot water with a super efficient electric heat pump taking energy from the air.

Electric Car Charging
Each home will have a smart charger that will charge any electric car. Using energy from the roof, battery or grid to enable greener travel.

PV Panels
Generate energy from the daylight on your roof with these slender black PV panels, transferring free energy into your home.

Heat Pump
No fossil fuels needed, heat your home and generate hot water with a super efficient electric heat pump taking energy from the air.

Underfloor Heating
Low temperature radiant heat from under the floor gives a comfortable heat around the ground floor and leaves more space for your furniture.

We have combined bespoke architecture with the latest eco-technologies and the highest internal and external finishes to give residents the best homes possible. Homes with very low fuel bills to relax in, homes to enjoy and homes that make you happy.”

Daniel Ball, Liv-Eco
